As a programmer with over 9 years of experience, I have built dynamic and scalable web applications using PHP, Laravel, Mysql, Reactjs, Docker, Git and other technologies. I have integrated web applications with various third-party services and APIs, and boosted their performance by up to 80%. I follow best practices such as SOLID principles, Database Design and Design Patterns to ensure high-quality code and performance. I enjoy learning new skills and challenges, and collaborating with diverse teams and stakeholders
